It is reported that the state of-ficials of Mississippiare trying to resort to technicalities in order to disfranchise the Socialist voters in the coming general election.

Henry C. Frick, the iron master, has just paid \$100,000 for a box at the opera in New York. He is supported by workingmen, and after making him a pensioner on their industry, they can hardly begrudge him the right of living up to his income. There is nothing small about the American workingman.

And the odd thing about it is that Japan itself believes in the exclusion of people who have a lower standard of living than the natives. It seems that railway contractors imported 800 Chinese into Japan, and their wages were thirty to fifty Japs. The workmen's guilds very nineteen carefully selected families properly objected and forced the in Washington, D. Wives are often referred to as consorts. In marine parlance a consort is a boat that is towed by a steambarge. If the steambarge is a seaworthy one so much the safer for the consort. Under the capitalist system the consort of an idle "duke" is the one that will wear the dia-monds. And that fact does not augur very well for the security of the American home.

According to Gen. Booth of the Salvation Army, high wages are are mighty glad to get that. Half soon to come to an end and the working class must prepare to accept the changed condition with planfulness in economizing and with becoming Christian resignation. But we are not so sure about sional pint of beer. the resignation business. In order to have a working class that is resigned to economic oppression, that working class must be ignorant of their rights. Education has gone too far for that. The working class is beginning to know. They know already that it is their industry that society rests on, and they are going society rests on, and they are going ing machine.

It was bad for him to be caught in the Western land scandals and it was so very important that his senatorial toga be kept from visible marks of uncleanliness that of the clutches of the law. And the Borah case shows very clearly how it can be done. A workingman tho breaks the law, however petty the misdemeanor, generally gets be-hind the bars so quick he has had scarcely time to know what has happened to him. There are no sympathetic officials ready to help him out of its meshes. Contrast this notorious fact with the procedure in the Borah case. Borah was the attorney for a thieving lumber com-pany, for a band of land pirates. He did the legal worle for the thieves. That is, his knowledge of law was used by them for hire in their nefarious schemes. The average man would say he was an accessory That it is criminal to help on crime Not so the court. The court practically ruled that unless the prosecu-tion could show that Borah was a partaker in the thievings that he could not be held. In the Borah case it was decided that no matter whether the senator drew up papers and gave legal counsel to the land thieves or not, he could not be found guilty unless it could be shown that he had also stolen land. And it was Borah and Hawley who in the Haywood case tried to make-use of the Haymarket case in Chicago, where men were sent to the gallows who were not convicted of having any knowledge of the bomb thrower, some of them not even knowing such a man existed. Borah was willing such a flagrant judicial out-rage should be used as a precedent in the Haywood case, but it is no-ticable that it was not even men-tioned when he himself was on trial!

AN INFAMOUS DECISION!

In the case of the Louisville and Nashville railroad company against the Alabama railroad commission, Judge J. C. "An employer has a property right in the services of his workmen in his business. The employer can maintain an action against anyone who entices his servant to teave him, or prevents the servant from working for his employer. This beautifully expressed sentiment and truth, Mr. President, in from the pen of one of our Socialists, Ahram Goldfield of Cleveland, O, whose exposute in book form of our awful waste disorder will soon reach the publishers. The figures presented are staggering.

Cannot you see that the nation is suffering from the lowering of the ideals of life? Is it not evident to you that for years searely a word has been said or written here that has contained in it a soul stirring thought? Can you not see the picture of a beautiful new world that is to be, Mr. President? Can not you for an instant blot out this awful mob now here, and discern a glimpse of the great luture? Do you not see the men of that time—all of them as physical and mental giants with ideals that must perpetuate the possible glory of the world? Cannot you see that is to be, the world? converted une. Here is what he had to say about capital and labor and "sinister deniagognes":

"In dealing with both labor and capital, with the questions affecting both corporations and trades unions, there is one matter more important to remember than angitt else, and that is the infinite harm done by preachers of mere discontent. These are the men who seek to excite a violent class hatred against all men of wealth. They seek to turn wise and proper movements for the better control of corporations and for deing away with the abuses connected with wealth into a campaign of hysterical excitement and falsehood in which the aim is to inflame to madness the brutal passions of mankind.

"The sinister demagogues and foolish visionaries who are always eager to undertake such a campaign of destruction sometimes seek to associate themselves with those working for a genuine reform in government and social methods, and sometimes masquerade as such reformers. In reality they are the worst enemies of the cause they profess to advocate, just as the purveyors of sensational slander in newspaper or magazine are the worst enemies of all men who are engaged in an honest effort to better what is bad in our social and governmental conditions.

"The hope for success for our people lies in a resolute and fearless, but sane and cool-headed, advance along the path marked out last year by this very congress. There must be a stern refusal to be misled into following either that hase creature who appeals and panders to the lewest matinets and passions in order to arouse one set of Americans against their fellows, or that other creature, equally base, but no baser, who, in a spirit of greed, or to accumulate or add to an aiready lung fortune, seeks to exploit his fellow-Americans with callous disregard to their welfare of soul and body."

In replying to the president's "safe and sane" advice, I wish to admit that I am one of the preachers of discontent. I shall countine, too, to preach discontent a long as hife lasts, for we can get prog

A Chance to Invest Some Money!

The \$12,000.00 Issue of Bonds Presents a Good

Opportunity,

To Sept. 30, individuals paid in \$1,825; branches of the Social-Demogratic party \$150, and unions \$1,200; a total of \$3,175. By months the receipts were as follows: April, \$25; May, \$975; June, \$550; July \$1,050; Aug., \$25; to September 24, \$550. Total \$3,175.

The money thus derived has been paid out as follows: eylinder press, gower paper cutter, chases, etc., about \$2,500; monthly payments on Mergenthaler linotype (the typesetting machine), \$450. and mouthly payments on job printing plant, \$250, or a total of \$3,200.

Exclusive of the \$3,175 paid in, \$2,825 are subscribed for, nearly all of thieb is merely an exchange of bonds for mortgages.

The Mergenthaler mortgage remains to be paid. This amounts to \$1,240.

The Mergenthaler mortgage remains to be paid. This amounts to \$1,340 and interest from Dec. 31, 1907. And this has got to be settled right

With the proceeds of this \$12,000 issue of bonds all outstanding notes and mortgages are to be paid. We are now forced to a "hand to mouth" existence and seldom, if ever, have sufficient balance of east on hand.

The sale of these bonds will leave the company a balance in cash of \$1,670 as working capital. It will be to the company's interest to sell only as many as are necessary, and so probably not more than \$11,000 will be disposed of immediately.

disposed of immediately.

The value of these bonds must not be confused with value of the stock of the Milwaukee Social-Democratic Publishing Co. This stock has never been held out as an investment. On the contrary, most, if not all of it, has been purchased just to belp the HERALD and not with any idea that it would ever pay dividends. Not so with the proposed bonds. We believe we are perfectly safe in recommending them as a sound and excellent intestment. They will bear 5 per cent interest, payable semi-annually. This is about 2 per cent more than banks ordinarily pay. And as for security, it is certainly every bit as good and better than that usually offered by savings banks. Banks loan money to just such concerns as ours, and accept this kind of notes as accurity. If, then, such security is good enough at the banks to loan deposits on, the depositors getting only 3 per cent, are not they just as safe and just as good when accepted direct from ns at 5 per cent?

The actual tangitle property against which the bonds are accepted.

The actual tangible property against which the bonds are to be issued, and upon which they will be a first mortgage lien, amounts to \$16,121.87. To this must be added more than \$1,000 of accounts due us in excess of what we owe others and \$1,670 cash, the amount left after everything is paid, making a total of about \$19,000 of assets behind these bonds.

This shows that the honds are well and amply secured. In fact, this valuation is based on a very conservative estimate. A none too high a figure would place the value of our assets at \$25,000.

Our readers are offered these bonds, to give such as care to invest an opportunity of as good, safe, sound and substantial an investment as deposits in savings banks ordinarily offer, but with a higher rate of interest. Under these circumstances don't you think it will pay you to withdraw at least a part of your savings account, and invest some in these bonds? Or, if you know of any one who bas money in the bank, or who has some to invest, see him at once on this proposition. Or if you do not wish to attend to this personally send name and address to us and advise us if you want to be mentioned.

Some men stand to take the places of those turned it for days, some for weeks, some out by the proprietors, managers, for months, but very few for years, stewards, chefs, head waiters, for the day of reckoning comes housekeepers, bead porters, chief sooner or later.

For instance, the writer of these years ago in the St. Andrew Hotel The working conditions in large in New York. There was a head hotels and restaurants are simply waiter named Z—, an old rascal, horrible. The hours are long and a typical product of capitalismwages are small.

So when the twenty-five men already mentioned were sent to the club to serve a fine wedding dinner, most of us had to get booked two or three days before the dinner came off and we had spent quite a little, each according to his means, in said waiters' exchange (because the proprietor is not in the kitchen, and he may be told by business for love, but for the profit the cook who is to prepare his orthat he makes out of the sale of der that it is not quite ready, that beer, cigars and cheap booze), besides which every waiter had to minutes. Well, we reached the club that evening at 5 o'clock and fixed up the tables. About 6:30 I started talking to the boys about demanding \$3.00 extra as the supper would last until after 11 p. m. So twenty-three of the twenty-five gave me their names and pledged their support. Since then the waiters have been demanding living wages, and it is not improbable that the cutthroat manager will sooner or later be looking for a new job.

In the foregoing lines I said that the system under which we live makes these managers, head wait-

Factories Discharged.

Chicago, Sept. 29.—Fruits of retrenchment by various big manufacturing concerns are becoming evident in Chicago. It is said that fully 18,000 men are now out of employment, due to this cause alone. Trimming down the forces at the stockyards has thrown 5,000 workers on the market. The factories of the International Harvester Co., including the McCormick plant, the old Deering factory in the city and the old Deering plant at Illurnside, has dropped about 4,000 men. The Griffin Car Wheel Co. has dispensed with 2,000 men; the Western Electric Co., it is said, has released fully 7,000, and the Pullman and other big concerns have reduced forces materially.

"The Ideas That Have Influenced Civilization" IN THE ORIGINAL BOCUMENTS

10 LARGE VOLUMES

The Most Important Contribution to Independent Research and Freedom of Thought That the Scholarship of the Centuries Has Yet Produced

T IS THE PURPOSE of this work to present the ideas that have influenced civilization in the words of those who have developed them. It has been our principle that it is much more satisfactory for the student and truth seeker to examine at first hand the results of the men who have influenced the thought and life of the world than it is to study some critic's meta-physical essay upon another man's work. It is much easier 10 physical essay upon another man's work. It is much easier to understand and appreciate the words of Plato, Jesus, Confucius, Buddha, Marx or Spencer than of men who write about them, however learned they may be. All documents, monographs, treatises, addresses or lectures we have given entire. we have been forced to take the exposition of the idea from a larger work, as, for example, Dalton's Atomic Theory from his Chemical Philosophy, we have still given that particular subject in full. The points of view of this work and any literary col-lection extant are so entirely diverse that the matter which has been given is absolutely different. In other great compilations emphasis has been laid upon purely literary values—beauty of expression, etc.; but in The Library of Original Sources the determining value has been exclusively that of thought. Where others have gathered the literary gems from poets, essayists, novelists and historians we have given the thought which has

been added to the world.

AS AN ILLUSTRATION of how subjects are treated, take "Socialism." In any of the great encyclopedias we would find perhaps two or three learned articles on this subject, dealing with it in a very scholarly and analytical way, but containing, of course, more or less prejudice, according to the writer's point of view, whomsoever he may be. However, in this work we find the idea of exposition almost entirely set aside, while instead, we simply begin with the earliest expression of the subject and give its evolution and history in the original documents and sources of information, bringing it right up to the

present time.

THIS WORK is compiled by the University Research Extension, a joint movement among the progressive university men of Europe and America to get back of the second and third hand sources of information to the original sources themselves along all lines of thought, such as Religion, Philosophy, Sociology, Science, History, Education, etc.—in other words, the sources to which encyclopedia writers, historians, lecturers and specialists have always gone and must always go for final and ultimate information.

For more than ten years a corps of 125 leading university specialists of the world has been searching through the great libraries, such as the Bodleian Library at Oxford, the Royal Library at Berlin, the Bibliotheque at Paris, the Vatican at Rome, and all the great monasteries and libraries of Europe and Asia, collecting, translating and arranging these sources in his-torical and chronological order for the use of the ordinary reader, the practical thinker, the truth seeker and the busy busi-

FOR OUR NEW READERS:

THIS COUNTRY is made up principally of working people, both industrial and agricultural, but it is ruled by the capitalist class, which is numerically a very small traction of the population. Being in courted, that class runs the government in its own interests and against the interests of the rest of the

We Socialists believe that the caucity should be managed to the leterests and for the well-being of those who produce the wealth. That is what government is for in the first place. The means of existence are now privately owned by capitalists, who comprise only twelve per cent of the population. By means of this private courseling a mere ONE PER CENT of the population. By means of this private courseling a mere ONE PER CENT of the people OWN OVER ITALF OF THE WARTION, and the concentration is going on at pell-mell speed.

The means of production should be owned by the collectivity, in order that the froits of industry may go to the MANY, instead of to the PEW.

the froils of industry may go to the MANY, instead of to the PEW.

Under the present capitalist system, the majority of markind must sell their labor power to the capitalistic owners of the means of production, and devision, in order to live—and to live very miserably at that.

The people own the pest office, and everybody is glad of the fact. The people ought also to own all the trasts, so that all may enjoy the benefits. They ought to own every industry as soon as it has become sufficiently concentrated and organized to peraut of such common awnership.

To bring this about, the people—that is, the workers, not the chickers—must have possession of the political power. The Social-Diemokratic party though the shothion of capitalism. We insist that the industrious class shall be the weakby class, and the vide class the poor and dependent class—although should be the weakby class, and the vide class the poor and dependent elass—although should be about the promoterate movement is international, but will doubless achieve success in the United States first, because the capitalist system is farthest developed here and has made greater headway in preparing the ground for the higher systems of society.

To show you that your interests lie with us we give herewith the following:

Program of International Social-Democracy:

- Collective ownership of all industries in the hands of trusts and com-and of all poblic utilities.
- and of all poblic utilities.

 The democratic management of such collective industries and utilities.

 Reduction of the hours of labor and progressively increased tenumeration.

 State and national insulance for the workers and honorable rest in old age.

 The ineaguration of public industries to saleguard the workers against 1 of employment.
- 5. Education of ALL children up to the age of eighteen years. No child labor.
 7. Educat political and civil rights tot both men and women. Emancipation

There is one calender which appears annually, the Gruet-likalender, which has a circulation of 30,000 copies.

The conditions on the Messaba Iron Range in Minnesota, where the miners have been on strike for several months, are almost intolerable. The minions of the United States Steel Corporation are using every conceiveable underhand method to break the strike and destory the union. The dynamite ar-tists have appeared, and dope can at any place where needed as a basis for wholesale arrests. The strikers retain unbroken ranks. The bosses are building their hopes of success on jailing prominent mem-bers and starving the men into submission by depleting their treasuries with enormous court costs.

Banks and Pledges Collected by J. Galbraith.

The comrades will note from our eport in another column that the oledges and banks brought in a clear gain of over eighty dollars in the month of September. \$45 were paid for the pocket banks, and the remainder of the profit was equally divided between the County Central Committee and the state treasury. Thus we have how reached a point where the proceeds of these collec-tions will bring in a good net sum for the party work. Every con-rade should take hold of this matter. and push it along, remembering that all work done this year is giving a fair start to the campaign of 1008.

DAVIDSON

At the Davidson on Sunday will be seen for the first time out of Chicago, "A Knight for a Day," which is being produced under the management of Mr. B. C. Whitney. This piece is deservedly very popular, its long run in Chicago at the Whitney Opera House, where it still attracts large crowds nightly, having established its reputation as

a musical comedy of unusual merit One of the most striking features of "The Blue Moon," in which James T. Powers and a big company comes to the Davidson Thurs day for three nights and Saturday matinee, is the gorgeousness of the scenery and costumes. Each of the and most of the company portray East Indians, although there is a plentiful sprinkling of British sol-

R. C. "The Isle of Bong Bong" abounds in pretty music and sterling stage successes of extraordinary merit. Particular attention might be called to the dramatic romance "San Antonio" and the spectacular Indian serenade, "Heap Love," these two musical numbers enlisting the serv-ices of the entire company. The presentation is said to be the eleverest and most original idea for descriptive songs.

Resolutions on Trade Unions Passed by last National Socialist Convention.

The trade and labor union movenent is a natural result of the capitalist system of production and is necessary to resist the encroachments of capitalism. It is a weapon to protect the class interests of labor under the capitalistic system However, this industrial struggle Ferullo at the Hippodrome, has the Hippodrome, has the Hippodrome, has the Hippodrome, has the Hippodrome at the Hippodrome has fairly caught the town. While the working class shall own all the other bands in the past have had means of production and direits hard work to fall the place. Ferullo tion. To achieve this end the workclass struggle.

The trade union struggle cannot attain lasting success without the political activity of the Socialist acteristic singing and dancing; Elliot and West, excentric dancers; litical power that they write the play, "The Fall of 64". In his appeal to the school board for justice Mr. Tiefenthaler referred to his markings by the superintendent, and yet the superintendent says nothing about these markings. Instead, he launches a lot of generalities at the desposed principal's head, gracefully as condemnatory as possible, and seems to lay most stress on his alleged "crabbedness" and "harshness."
